

BRAIN EVENT

It might look a bit like a great big cauliflower and probably weighs the same too! But your brain is more powerful, more complex and cleverer than any computer ever built (unless you are like Patrick, in which case your brain is just a little less clever than a peapod.) Here are some fascinating facts about the human brain.

WHAT KIND OF FISH PERFORMS BRAIN SURGERY?
A NEURO-STURGEON!

AMAZING BRAIN!

YOU BTTEER BLEIVEE IT VOOR BIARN IS CLEVER. JSUT TRY AND SEE IF YOU CAN RAED THIS. MSOT LKIELV YOU CAN. THIS IS BCUSEAE THE MNID DEOS NOT RAED ALL LTETERS, OLVN THE WRD AS A WLHOE ACCDQRING TO RSCHEEARCH AT CMABRIDGE UNIVRESITY.

As long as the first and the last letter of a word are in the right place, it doesn't matter if the rest of them are jumbled up, most people will still be able to read the text because the brain will process the word if THINKS is being written.

YOUR EYEBALLS ARE AN EXTENSION OF YOUR BRAIN.

If someone were to open up your skull and remove your brain, your eyeballs would come with it (do not try this at home!) That's because your eyes are hardwired to a lobe at the back of the head responsible for sight information.

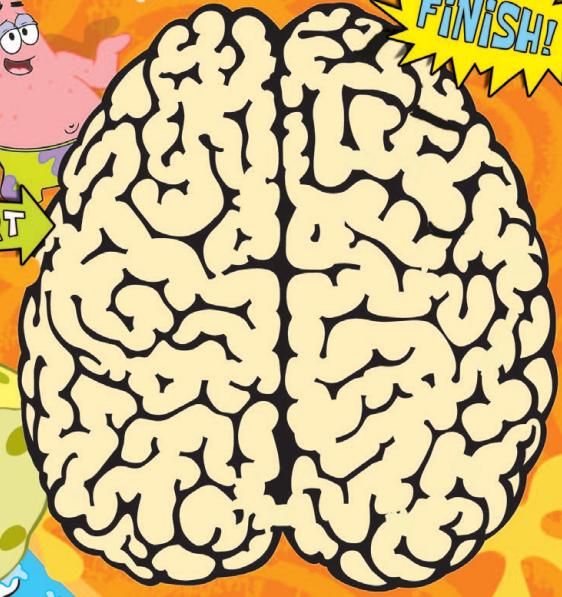

WATT?!

The brain operates on the same amount of power as a 10watt light bulb. So that cartoon image of a light bulb over your head when a great thought occurs isn't too far off the mark!

BRAIN MAZE

Can you help Patrick through this brain maze?

WATER GOOD IDEA!

Brain tissue is a squishy, pink and jelly-like organ, thanks to the high water content of the tissue. So the next time you're feeling dehydrated get a drink to keep that brain nice and squishy.

VROOOOM!

Ever wonder how you can react so fast to things around you or why that stubbed toe hurts right away? It's due to the super-speedy movement of nerve impulses from your brain to the rest of your body and vice versa, bringing reactions at the speed of a high powered luxury sports car (or a rickety old push-bike, if you're Patrick Star!)
